

## Newsletter September 2023

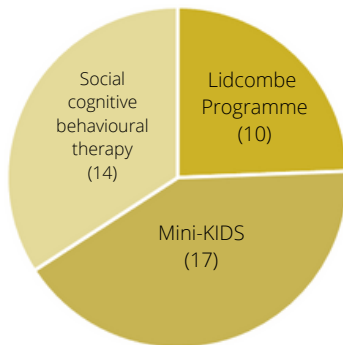

### Numbers

Thanks to our speech language therapists there are currently 75 children in the study who are receiving/have received treatment.

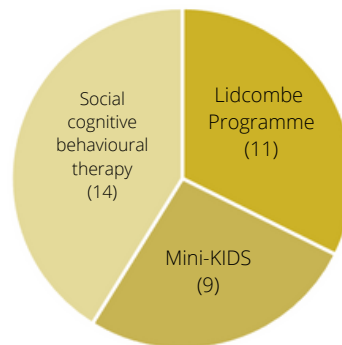

#### Overview Flanders

(41 children)

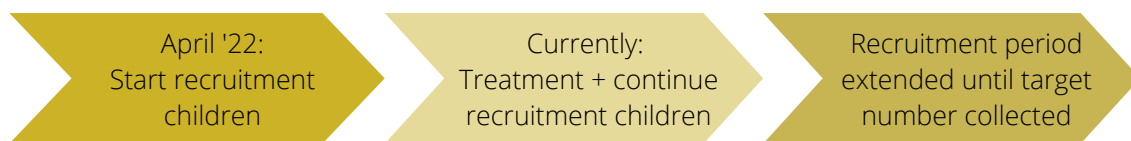

#### Overview Wallonia

(34 children)

### Where are we currently in our research?

We are still in the process of collecting preschoolers who stutter. The target number is 249. This means that we are still looking for a lot of preschoolers, which is why the recruitment period will be extended. Be sure to keep informing doctors, schools and fellow speech therapists about the study so they can refer to one of our speech therapists.

### Important dates

**September 1** We wish everyone a great start of the new school year!

**October 22** Next month it is International Stuttering Awareness Day. A day when we create awareness about stuttering.

Thank you for your interest in the TreatPaCS study!
