

### Numbers

Thanks to our speech language therapists there are currently 88 children in the study who are receiving/have received treatment.

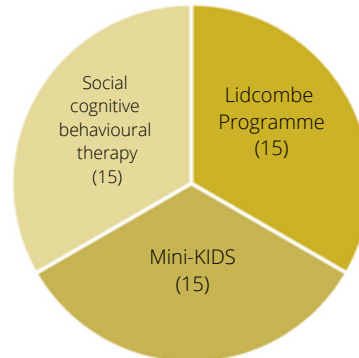

#### Overview Flanders

(43 children)

#### Overview Wallonia

(45 children)

### Did you know...

- One SLT was already able to recruit 10 children? Another SLT 9, someone 8, someone 7 and two SLT's 6. Thank you to all TreatPaCS speech therapists for working so hard for it!
- Six children passed the 18-month point? A very important measuring point in the study!
- Long-term follow-up is important in stuttering, given the likelihood of relapse? Parents should know well what they can do if that happens. Be sure to watch the [video on the site](#) explaining this.
- Making a video is not easy for some parents? Then be sure to show them the new [video on the site](#) with ideas on how to do it.
- The TreatPaCS research team wishes you a very happy holiday season with especially lots of togetherness-warming moments, and then of course a good start to 2024!

Thank you for your interest in the TreatPaCS study!
