

### Numbers

As you could read in the previous newsletter, we completed the recruitment process with 251 children. From this group, **117 children** have already reached the important **18-month milestone**.

### Where are we currently in the study?

All children taking part in the study receive their treatment as planned. We will also continue to collect data at the various measuring points over the next two years. The available data is currently being cleaned up so that it can be analysed after the final measuring point.

### Dinner SLTs

As usual, we met up again for a catch-up over dinner. This time in Brussels and Leuven.

Brussels

Leuven

Thank you for your interest in the TreatPaCS study!
